SÉRIE

Migrations between Africa and Europe (MAFE) (2008 – 2010)

INFORMATIONS SUR LA SÉRIE

The MAFE project is a large-scale initiative wishing to study migrations between sub-Saharan Africa and Europe.

The MAFE project has produced multi-site, comparative and longitudinal surveys in three African countries (Senegal, Congo, Ghana) and six European countries (Belgium, France, Italy, Netherlands, Spain, UK). It provides a unique source of data that allows researchers to study the trends, causes and consequences of African migrations. The data collected in African countries can also be used to study other socio-demographic phenomena (family formation, fertility, socio-economic trajectories, etc.).

Because migrations are not solely determined by the individual and family levels, the MAFE project also collected data at the national level. These data are gathered in a contextual database which consists of about 100 indicators covering the 9 MAFE countries in areas such as demography, economy, unemployment, education, political context.

RÉSUMÉ

Le projet de recherche MAFE est une initiative de grande ampleur dont l'objectif est d'étudier les migrations entre l'Afrique subsaharienne et l'Europe. - Attention, la documentation des enquêtes MAFE est en langue anglaise. -

The MAFE project is a major research initiative focused on migration between Sub-Saharan Africa and Europe. It brings together ten European and African research centres working on international migration.

In the early XXlth Century, international migration from Sub-Saharan Africa to Europe has generated increasing public and policy attention. The flotilla of boats bringing would-be migrants to the Canary Islands, and attempts to reach Spanish territory in Ceuta and Mellila have drawn a rapid response from Europe in the form of new policy measures. Yet the scope, nature and likely development of Sub-Saharan African migration to Europe remained poorly understood, and, as a result, European policies may be ineffective. A major cause of this lack of understanding was the absence of comprehensive data on the causes of migration and circulation between Africa and Europe.

The MAFE project aimed at overcoming this lack of understanding by collecting unique data on the characteristics and behavior of migrants from Sub-Saharan countries to Europe. The key notion underpinning the project was that migration must not only be seen as a one-way flow from Africa to Europe. The argument was that return migration, circulation and transnational practices are significant and must be understood in order to design better migration policy.

The MAFE project focused on migration flows between Europe (Belgium, France, Italy, the Netherlands, Spain and the UK) and Senegal, the Democratic Republic of Congo and Ghana, which together accounted for over a quarter of all African migration to the EU at the time of the survey. In each of these "migration systems", the survey was designed to document

four key areas:

- Patterns of migration :

*the socio-demographic characteristics of migrants,

*the routes of migration from Africa to Europe, and

*the patterns of return migration and circulation.

- Determinants of migration: looking at departure, but also return and circulation and taking into account the whole set of possible destinations.

- Migration and Development: MAFE documents some of the socio-economic changes driven by international migration, looking as often as possible at both ends of the Afro-European migration system, at the individual level.

- Migrations and Families: the data collected by the MAFE project can be used to study all sorts of interactions between family formation and international migration. Although the survey was primarily designed to study international migration, it can also be used to study other phenomena, especially in Africa: domestic mobility, labor market participation, family formation, etc.

Comparable data was collected in both 3 sending and 6 destination countries, i.e. in sub-Saharan Africa and in Europe. The data are longitudinal - including retrospective migration, education, work and family histories for individuals - and multi-level - (with data collected at the individual and household levels, in addition of macro-contextual data).

Please consult the official MAFE website for further details : <https://mafeproject.site.ined.fr/en/>

Couverture

COUVERTURE GÉOGRAPHIQUE

Six European countries and three African countries participated in the MAFE surveys. Data collection was carried out in both sending countries in Africa and destination countries in Europe, in order to constitute transnational samples.

For MAFE DR Congo, data was collected in the Democratic Republic of Congo (African part), and Belgium and United Kingdom (European part).

UNIVERS**DR CONGO**

Household: Households selected randomly from the updated list of households in the selected primary sampling units. Three strata were distinguished: households with return migrants, with migrants abroad, and without migrants.

Individual: People aged 25-75, born in DR Congo. This lower age limit was set in order to obtain informative life histories. By not including respondents younger than 25, the resources were used more effectively. The place of birth criterion was used to exclude people who were born out of their country of origin in order to exclude second generation migrants in Europe and to increase the homogeneity of sample.

All the return migrants and partners of migrants, and one randomly selected other eligible person. Return migrants were eligible if their first departure was above at 18 or over.

EUROPE

In all the European countries, the surveys were conducted among males and females who were aged 25 and over at the time of the surveys, and who were 18 or over when they had left Africa for the first time for at least one year. Migrants from only DR Congo were interviewed.

Echantillonnage

PROCÉDURE D'ÉCHANTILLONNAGE

Probability: Stratified

DR CONGO

A three-stage stratified random sample was used. At the first stage, primary sampling units (census district) were selected randomly with varying probabilities. At the second stage, households were selected randomly in each of the selected primary sampling units (PSUs). At the third stage, individuals were selected within the households.

a) Selection of primary sampling units (first stage)

For DR Congo, the target area was the city of Kinshasa. In this city, a sampling frame of primary sampling units was prepared. No recent census was available, so the sampling frame of the 2007 DHS was used to select neighbourhoods, and in each selected neighbourhoods, a sampling frame of streets was prepared.

In DR Congo, a sample of 29 neighbourhoods (out of 324) was selected randomly with a probability proportional to size, and 3 streets were selected randomly with a probability proportional to size in each neighbourhood (87 sampling units). The sample was stratified at the first stage in DR Congo (3 strata).

b) Selection of households (second stage)

A listing operation was carried out in each of the selected survey sites to prepare the sampling frame of households. The listing consisted in enumerating all the households in the selected sites, and in identifying whether these households included migrants or not. In DR Congo and Ghana, three categories of households were distinguished (households with return migrants, with migrants abroad, and without migrants). 7 households were selected in each of the 3 strata (if less than 7 households were available in one or several strata, the remaining households were selected in the other stratum). The sampling rate was higher in strata of households with migrants, in order to get a sufficient sample of such households.

c) Selection of individuals (third stage)

In each of the selected households, one or several respondents were selected among the eligible people (people aged between 25 and 75, and born in the origin country). In DR Congo and Ghana, all the return migrants and partners of migrants currently abroad were selected. In addition, one other eligible member was randomly selected. A special tool had been designed so that the interviewers could randomly select the people during the fieldwork.

Two types of questionnaires were used in the departure countries: the household questionnaire and the individual life history questionnaire.

- The first questionnaire was used among a representative sample of households in the target region.
- The second questionnaire was used among a sample of individuals in the selected households, targeting both return migrants and non-migrants. The household questionnaire was thus used as the sampling frame for the selection of individual respondents.

EUROPE

The objective of the survey was to obtain a sample 'as representative as possible' of the African populations (Congolese, Ghanaian, Senegalese) in the destination countries (150 individuals per origin and destination country). The way the sample was constituted may vary across countries, but some common principles were respected:

- The composition of the sample should be as close as possible to the population of (Congolese, Ghanaian, Senegalese) migrants in the country in terms of gender, geographic distribution, age, socio-economic category or occupation.
- One exception: the sample should be gender balanced. Males and females should be equally represented in order to allow gender analyses.
- Samples in origin and destination may be linked, but migrants with weak or no relationships at origin should not be excluded from the sample.
- Both documented and undocumented migrants should be represented in the sample.

As no suitable frame was available to select randomly individual respondents in five of the six European countries (Spain being the exception), it was decided to use quota sampling. In all the countries, the quotas were set by age and gender at least. In Belgium and the UK, the countries of MAFE Congo, the place of residence was used in the quotas.

In Belgium, the whole country was covered, and quotas were set by provinces (11 provinces - within each province the sample was allocated to communes or groups of communes according to the number of Congolese migrants in these communes). In the United Kingdom, the surveys were concentrated in the London area and in the places where Congolese migrants were living.

Randomness was also included in the samples in different ways. For instance, in Belgium, a random sample of places was selected according to the number of people of Congolese origin living in these places. Respondents were selected in these places. The combination of different recruitment methods also ensured that different types of persons had a non zero probability of being included in the sample. For instance, some respondents were recruited in public spaces (street, metro station, hairdresser...), others were randomly selected from list of volunteers identified in churches...

Belgium

- Target areas: Whole country
- Sample size: 279
- Quotas: By age, gender and place of residence
- Recruitment methods: Public spaces, migrant associations, churches, snowballing, phonebook, centers for asylum seekers, interviewers' contacts

United Kingdom

- Target areas: Whole country
- Sample size: 149
- Quotas: By age, gender and place of residence
- Recruitment methods: Public spaces, churches, snowballing, interviewers' contacts

TAUX DE RÉPONSE

DR CONGO

For the household questionnaire, 1773 households were selected, only 1576 were successfully interviewed, including:

- Non-migrant household: 470
- Household with at least 1 returnee: 351
- Household with at least 1 current migrant: 1027
- Household with returnee(s) and current migrant(s): 272

This represents a response rate of 88.8%.

For the biographic questionnaire, 1 946 individuals were selected, only 1 638 were interviewed, including:

- Returnees: 322
- Partners left behind: 77
- Other non-migrants: 1239

This represents a response rate of 84.2%.

The overall response rate in DR Congo is 74.9%.

EUROPE

397 Congolese migrants were successfully interviewed: 278 in Belgium and 150 in the United Kingdom.

PONDÉRATION

DR CONGO

The computation of sampling weights relies on computing sampling probabilities at each stage. The product of sampling probabilities at each stage gives the overall sampling probability. Taking the inverse of the sampling probability gives the inflation factor. These factors are adjusted (taking into account non-response and by trimming the weights). They are then normalized, so that the sum of weights is equal to the sample size.

EUROPE

In the European countries, similar sample sizes were selected for males and females, resulting in an overrepresentation or underrepresentation in the MAFE samples. Similarly, older people were usually oversampled. For these reasons, post-stratification weights are computed to give each observation its proper weight and to match the samples as closely as possible to selected population characteristics.

In the MAFE data, all survey weights have been rescaled (normalized) so that the sum of weights corresponds to the sample sizes of households and individuals respectively while the mean of the weight variables equals one.

For further details about weights, please read the MAFE methodological note 6 entitled "Sampling and Computation Weights in the MAFE Surveys" (see related materials).

Collecte des données

DATES DE COLLECTE

Début	Fin	Cycle
2009-05	2009-06	DR Congo pilot survey
2009-06	2009-11	United Kingdom survey
2009-07	2010-02	Belgium survey
2009-08	2009-11	DR Congo (Kinshasa) survey

FRÉQUENCE DE LA COLLECTE

DR CONGO

In DR Congo, the survey preparation started in March 2009. A pilot survey was organized in May-June 2009. The selection of the survey sites was done in June 2009, and the listing of the households in the selected sites started in June and ended in July 2009. Data collection started in early August, soon after the training of interviewers and the sampling of households. It lasted for about 4 months, until mid November. Like in Ghana, both the household and biographic surveys were conducted at the same time. Editing and coding was also done during the fieldwork and ended a few weeks after the fieldwork. Because of administrative problems with money transfer, data entry started a little bit later.

EUROPE

In Belgium and United Kingdom, data collection was conducted in 2009-2010. Data collection lasted about five months in the UK and seven months in Belgium. Editing was done along data collection. Data entry was done between October and December 2009 in the UK, and between December 2009 and March 2010 in Belgium.

MODE DE COLLECTE

Face-to-face interview: Paper-and-pencil (PAPI)

INFORMATIONS SUPPLÉMENTAIRES SUR LA COLLECTE

The MAFE surveys collect information on potentially vulnerable populations (undocumented migrants) and on sensitive subjects (remittances, legal status...). In order to facilitate the fieldwork and increase the quality of the data, it was

important to carefully inform the people who were to be interviewed.

The legal pre-requisites changed according to the country. In France (only), a legal authorization had to be obtained before starting the fieldwork. The CNIL (Commission nationale informatique et libertés) was concerned by the way the contacts were going to be obtained in Senegal and, most of all, by the sensitivity of certain variables contained in the questionnaires (ethnic group, religion). We obtained the authorization to ask these questions, but in order to keep them in our files, we had to ask to the interviewees to sign a written informed consent.

According to legal prescriptions, in all European countries, a letter was designed to explain their rights to the interviewees.

In most countries, a leaflet was designed and used to sensitize respondents and authorities about the MAFE project.

In advance of the survey, several communication actions have been undertaken:

- In Africa, inform neighbourhood heads / municipalities of survey by an official letter or by a visit
- Use local radio / migrants radio and chat show to present the survey
- Inform an organisation of migrants who can support the survey
- Visit the key places of the community (churches...)

Because of the complexity of the questionnaires, only interviewers with a good experience in complex surveys were recruited.

In African countries, it was highly recommended to hire the same interviewers to conduct both household surveys and individual surveys. This approach proved to be very efficient in all the surveys.

In Europe, interviewers had to be able both to recruit the migrants and to fill correctly the questionnaire. As a general rule, it was preferable to have a relatively small number of well-trained interviewers than a large number of interviewers.

Overall, around 20 to 25 interviewers and supervisors were involved in data collection in each country.

The number of the interviewers per survey varied between 8 (survey among Ghanaians in the UK) and 17 (Netherlands). In all the countries, both male and females interviewers were hired; most of them had higher education and some experience with data collection. In some countries (e.g. France), some of them were professional interviewers. The selected interviewers were not necessarily from the same country as the respondents, but most of them also had foreign origins.

For instance, 7 of the 12 interviewers in Belgium were of foreign origin, 5 of them from DR Congo. In the Netherlands, most interviewers were from Ghanaian origin. The fact that many of the interviewers were themselves of foreign origin seemed to have positively influenced the willingness of interviewees to participate in the survey.

Directly after being filled, questionnaires were checked by the interviewers and supervisors. They were then sent to a small team of editors for an in-depth reading. The editors consisted of 9 people in Senegal, 6 in Ghana and 5 in DR Congo. The team had followed the same training as the interviewers, and also received a specific training for editing the questionnaires. Data entry was performed using MS Access programs prepared by Ined.

A methodological note entitled "Sampling international migrants with origin-based snowballing method: New evidence on biases and limitations", written by Cris Beauchemin and Amparo González-Ferrer, can be found in the study's related materials, as well as another methodological note in french "Biais de non-réponse dans l'enquête Migrations entre l'Afrique

et l'Europe (MAFE-Sénégal)" written by Nicolas Razafindratsima, Stéphane Legleye and Cris Beauchemin.

Conditions d'accès

FORMULAIRE DE CONFIDENTIALITÉ

Si la demande est acceptée, cela conduit à la signature d'un engagement individuel à destination de l'Ined, et d'un engagement de confidentialité à destination du Comité du Secret Statistique. Ces engagements requièrent : -D'utiliser les données exclusivement dans une finalité de recherche ; -De ne pas céder ces données, sous quelque forme que ce soit, à une tierce personne, que ce soit à titre gratuit ou onéreux ; -De traiter ces données conformément aux règles de l'art et du secret statistique ; -De mentionner la source des données dans mes communications, publications... conformément au modèle de citation pour l'utilisation des données (cf. ci-après) ; -D'informer le diffuseur de mes communications, publications... et lui en faire parvenir les références ; -D'informer le diffuseur des constats relatifs à la qualité des données ou à leur difficulté d'utilisation ; -D'informer le diffuseur de toute réutilisation des données pour une autre recherche que celle spécifiée ci-dessus ; -De détruire les fichiers à l'issue du travail de recherche ; -De respecter la réglementation en matière de protection des données personnelles.

CONDITIONS

L'acceptation de la demande faite sur le portail de commande de Quetelet-PROGEDO-Diffusion dépend du statut de l'utilisateur, de la présence d'une adresse e-mail institutionnelle et d'un projet de recherche. Si la demande est acceptée, cela conduit à la signature d'un engagement individuel à destination de l'Ined, et d'un engagement de confidentialité à destination du Comité du Secret Statistique. Si les données sont analysées de manière collective, tous les membres du groupe de travail doivent faire une demande d'accès.

RESTRICTIONS D'ACCÈS

Les fichiers diffusés dans le cadre de Quetelet-PROGEDO-Diffusion sont accessibles aux chercheurs français et étrangers, doctorants, post-doctorants, et étudiants de master à des fins de recherche, de production scientifique et dans certains cas d'enseignement. Toute utilisation commerciale est exclue.

Les critères d'une finalité de recherche sont la production ou reproduction, dans un but de validation de connaissances nouvelles de portée générale. Les résultats sont publics et libres de diffusion.

TEXTE À CITER

Every user of the MAFE data must cite this paragraph in its publications:

English version : "The MAFE project is coordinated by Ined (C. Beauchemin) and is formed, additionally by the Université catholique de Louvain (B. Schoumaker), Maastricht University (V. Mazzucato), the Université Cheikh Anta Diop (P. Sakho), the Université de Kinshasa (J. Mangalu), the University of Ghana (P. Quartey), the Universitat Pompeu Fabra (P. Baizan), the Consejo Superior de Investigaciones Científicas (A. González-Ferrer), the Forum Internazionale ed Europeo di Ricerche sull'Immigrazione (E. Castagnone), and the University of Sussex (R. Black). The MAFE project received funding from the European Community's Seventh Framework Programme under grant agreement 217206. The MAFE-Senegal survey was conducted with the financial support of Ined, the Agence Nationale de la Recherche (France), the Région Ile de France and the FSP programme 'International Migrations, territorial reorganizations and development of the countries of the South'. For more details, see: <http://www.mafeproject.com/>"

French version : "Le projet MAFE est coordonné par l'Ined (C. Beauchemin), en partenariat avec l'Université catholique de Louvain (B. Schoumaker), la Maastricht University (V. - flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_migration

!! One line per long & short stay outside DR Congo for each person who declares at least one stay and one line per individual who did no stay abroad !!

This dataset contains:

- all the answers to the module Long & Short stay outside DR Congo.
- a series of dichotomous variables created from the questions q610, q614, q615, q616, q617, q619.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr	2430	159
- strata_area		
- strata_hh		
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_network

!! One line per migration (for stays of at least one year) for each person in the network of the interviewee, and one line for each interviewee who has nobody abroad !!

This dataset contains:

- all the answers to the module Migrations of Family Members and Personal Network.
- computed variables: id_enf, id_uni, id_net and id_netmig.

All MAFE's biographic files include the same 18 variables listed below:

- ident
- id_country
- n_menage
- n_indiv
- num_dr
- strata_area
- strata_hh
- strata_ind
- q1
- q1a
- age_survey
- q18
- flag_age
- flag_arrival
- flag_visitor (exception: only available for MAFE Senegal)
- weight_eur
- weight_all
- weight_etry

10262 34

rdc_qb_short_return

!! One line per return to DR Congo of less than a year for each person who declared at least one short return (without a resettlement intention) or one line for a multiple return, and one line for all other individuals !!

This dataset contains all the answers to the module Return to DR Congo of Less than a Year.

All MAFE's biographic files include the same 18 variables listed below:

- ident
- id_country
- n_menage
- n_indiv
- num_dr
- strata_area
- strata_hh
- strata_ind
- q1
- q1a
- age_survey
- q18
- flag_age
- flag_arrival
- flag_visitor (exception: only available for MAFE Senegal)
- weight_eur
- weight_all
- weight_etry

2299 20

rdc_qb_short_stay

!! One line per stay of less than a year outside DR Congo for each person who declared at least one stay !!

This dataset contains all the answers to the module Stays of Less than a Year outside DR Congo.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr		
- strata_area	3416	22
- strata_hh		
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_citizenship

!! One line per citizenship for each person (everybody should have at least one citizenship) !!

This dataset contains all the answers to the module Citizenship.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr		
- strata_area		
- strata_hh	2292	22
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_asylum

!! One line per asylum application for each person who has made at least one application, and one line for the other individuals !!

This dataset contains all the answers to the module Asylum.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr		
- strata_area	2091	23
- strata_hh		
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_residence_permit

!! One line per residence permit for each person who has had at least one permit, and one line for the other persons !!

This dataset contains all the answers to the module Residence Permits.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr		
- strata_area	2798	25
- strata_hh		
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_work_permit

!! One line per work permit for each person who has had at least one permit, and one line for the others !!

This dataset contains all the answers to the module Work Permits.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr		
- strata_area	2753	24
- strata_hh		
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_transfer

!! One line per transfer for each person who has sent remittances at least once, and one line for the other persons !!

This dataset contains:

- all the answers to the module Transfers.
- the created variable nom_transr which gives the total number of transfers made by Ego.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr		
- strata_area	2190	22
- strata_hh		
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qb_association

!! One line per period during which each person has joined a migrant association, and one line for the other persons !!

This dataset contains all the answers to the module Associations.

All MAFE's biographic files include the same 18 variables listed below:

- ident		
- id_country		
- n_menage		
- n_indiv		
- num_dr		
- strata_area	2080	20
- strata_hh		
- strata_ind		
- q1		
- q1a		
- age_survey		
- q18		
- flag_age		
- flag_arrival		
- flag_visitor (exception: only available for MAFE Senegal)		
- weight_eur		
- weight_all		
- weight_etry		

rdc_qm_household

One line per HH, i.e. a total of 1576 HH in DR Congo

The dataset contains information on:

- HH characteristics (computed variables from modules A & B);	1576	187
- HH head characteristics (all variables from module A, including the computed variables created for the dataset "qm_indiv"). Variables names: hh_a1 to hh_a21;		
- Housing and assets of the HH head (module E);		
- Information on the conduct of the interview (module O).		

rdc_qm_indiv

One line per declared individual in the HH questionnaire, i.e. a total of 15558 individuals in DR Congo

Observations in this data file correspond to:

- Individuals living in the household at the time of the survey (A4=1)
- Individuals living outside the household (A4=2) included in the roster if they enter into one of the following categories:
 - */ children of the HH head who no longer live with her/him, whatever her/his place of residence;
 - */ partners of household members who live outside DR Congo;
 - */ parents of household members who live outside DR Congo;
 - */ other people living outside DR Congo and who had regular contact with the household during the 12 months before the survey.

WARNING! Don't forget that only part of the people listed in the household questionnaires, i.e. in "qm_indiv" are actual members of the households.

Furthermore, keep in mind that some individuals, in this dataset, never lived in Congo, Ghana or Senegal. For example:

- Descendants of migrants, born in the destination country of their parents. Ex: the HH head is a grandfather whose son has immigrated to France, where he had children. These children can be mentioned by the grandfather in the third category "other persons living outside Senegal but who have kept regular contact with the HH during the 12 months before the survey", even if they have never lived in Senegal.
- Relatives of immigrants in Congo, Ghana or Senegal. Ex: the HH head is an immigrant woman from Angola. She has left behind (in her home country) her husband and children. Even if they have never lived in Congo, she mentioned them in the HH questionnaire because they are in the third category.

The dataset contains all variables of the questionnaire and some additional computed variables.

rdc_qb_return

!! One line per return to DR Congo for each person who declared at least one return and one line for the other interviewees !!

Note: returns listed in this module are returns that lasted at least 1 year and shorter returns but with the intention of settling. Other returns (less than a year without intention to resettle) are listed in the qb_short_return datafiles.

This dataset contains:

- all the answers to the module Return to DR Congo.
- a series of dichotomous variables created from the questions q707 and q708.

All MAFE's biographic files include the same 18 variables listed below:

- ident
- id_country
- n_menage
- n_indiv
- num_dr
- strata_area
- strata_hh
- strata_ind
- q1
- q1a
- age_survey
- q18
- flag_age
- flag_arrival
- flag_visitor (exception: only available for MAFE Senegal)
- weight_eur
- weight_all
- weight_etry

2103 72

Fichier de données: rdc_qb_general

!! One line per interviewee !!

This dataset contains variables that do not vary over time, i.e. answers to the introductory module of the questionnaire and to variables from the inter-modules of the questionnaire, plus some computed variables.

As for variables statu_mig, migr_cur, migr_ret, migr_cjt and migr_no: a same individual can be coded 1 in several of the migratory status variables; e.g. a same individual can be both returnee and a partner of a migrant at the time of the survey. NB: these variables may show results different from the stratification variable (strata_ind), which content was determined by answers given by proxy respondents in the household surveys. These variables (migr_*, presented in this table) are computed using the information obtained in the biographic surveys.

All MAFE's biographic files include the same 18 variables listed below:

- ident
- id_country
- n_menage
- n_indiv
- num_dr
- strata_area
- strata_hh
- strata_ind
- q1
- q1a
- age_survey
- q18
- flag_age
- flag_arrival
- flag_visitor (exception: only available for MAFE Senegal)
- weight_eur
- weight_all
- weight_ctry

V201	q12a	Year of father death	Q12A. In which year did he die?
V202	q13_1	Mother nationality 1	Q13. And what was or were your mother's nationalities? First nationality
V203	q13_2	Mother nationality 2	Q13. And what was or were your mother's nationalities? Second nationality
V204	q14	Is she alive	Q14. Is she alive?
V205	q14a	Year of mother death	Q14A. In which year did she die?
V206	q17p	Has your father already lived for at least a year abroad	Q17P. Has your father already lived for at least a year outside DR Congo?
V207	q17m	Has your mother already lived for at least a year abroad	Q17M. And has your mother already lived for at least a year outside DR Congo?
V208	q17f	Has your brother(s) already lived for at least a year abroad	Q17F. And one or several of your brothers, have they already lived for at least a year outside DR Congo?
V209	q17nf	How many brothers already lived for at least a year abroad	Q17nF. How many?
V210	q17s	Has your sister(s) already lived for at least a year abroad	Q17S. And one or several of your sisters?
V211	q17ns	How many sisters already lived for at least a year abroad	Q17nS. How many?
V212	q17c	Has your (previous) partner already lived for at least a year abroad	Q17C. And one of your partners or previous partners, have they already lived for at least a year outside DR Congo?
V213	q17nc	How many (previous) partners already lived for at least a year abroad	Q17nC. How many?
V214	q17e	Has your child(ren) already lived for at least a year abroad	Q17E. And one or several of the children you mentioned?
V215	q17ne	How many children already lived for at least a year abroad	Q17nE. How many?

ID	Name	Label	Question
V216	q17a	Has other relative/friend already lived for at least a year abroad	Q17A. And other relatives or close friends you could count on, or could have counted on to take you in, or help you to migrate out of DR Congo?
V217	q17na	How many other relatives/friends already lived for at least a year abroad	Q17nA. How many?
V218	q17t	Total	Q17T. Total:
V162	q100	Number of partnerships	100. You have had __ relationships.
V163	q200	Number of children	200.
V164	q300	Number of houses	300. YOU HAVE THUS LIVED IN __ HOUSES.
V219	q18	Which is the last school year you attended	Q18. Let's talk about your studies: Which is the last school year you attended?
V221	q19	Do you have a diploma	Q19. Do you have a diploma?
V222	q19d	Which is the highest diploma you have attained	Q19D. Which is the highest diploma you have attained? Plain text answer
V230	q19d_c1	Highest diploma level 1	Q19D. Which is the highest diploma you have attained? Recoded diploma 1
V229	q19d_c2	Highest diploma level 2	Q19D. Which is the highest diploma you have attained? Recoded diploma 2
V224	q19e	In which discipline	Q19E. In which discipline? Plain text answer
V228	q19e_c1	Study field level 1	Q19E. In which discipline? Recoded discipline 1
V227	q19e_c2	Study field level 2	Q19E. In which discipline? Recoded discipline 2
V226	q19e_c3	Study field level 3	Q19E. In which discipline? Recoded discipline 3
V223	q19y	In what year did you receive this diploma	Q19Y. In what year did you receive this diploma?
V165	q400	Number of activite/inactivite periods	400.
V231	q20pa	Current plots of land	1. Are you CURRENTLY owner, in DR Congo or elsewhere... ..of one or several plots of land (agricultural land, building plot, or under construction)
V232	q20la	Current house units	1. Are you CURRENTLY owner, in DR Congo or elsewhere... ..of one or several house units (house, apartment...)
V233	q20ca	Current business, venture, commercial premises	1. Are you CURRENTLY owner, in DR Congo or elsewhere... ..of a business, venture, commercial premises even on a rental basis (shop, workshop, taxis...)
V234	q20ta	Total current	Total (current)
V235	q20pp	Past plots of land	2. And IN THE PAST, have you been owner, in DR Congo or elsewhere... ..of plots that you don't own anymore?
V236	q20lp	Past house units	2. And IN THE PAST, have you been owner, in DR Congo or elsewhere... ..of house units that you don't own anymore?
V237	q20cp	Past business, venture, commercial premises	2. And IN THE PAST, have you been owner, in DR Congo or elsewhere... ..of a business, a venture, commercial premises even on a rental basis that you don't own anymore?
V238	q20tp	Total past	Total (past)
V239	q20tot	Total current and past assets	Total (all)
V240	q21	Money transfers	Q21. Have there been periods at any time of your life during which you used to send regularly money to somebody who was living in a different country from the one where you were at the time (for example, from DR Congo to Belgium, from the UK to DR Congo, from Belgium to the UK...)?
V241	q22	International migration attempts	Q22. We have already talked about the places where you lived for at least one year. But have you ever undertaken concrete steps in order to leave and settle in a different country, without, however, having so far been successful in getting there?

ID	Name	Label	Question
V242	q22p_1	1st country EGO wanted to go	Q22. We have already talked about the places where you lived for at least one year. But have you ever undertaken concrete steps in order to leave and settle in a different country, without, however, having so far been successful in getting there? If "Yes" => To which countries did you want to go? First answer
V243	q22p_2	2nd country EGO wanted to go	Q22. We have already talked about the places where you lived for at least one year. But have you ever undertaken concrete steps in order to leave and settle in a different country, without, however, having so far been successful in getting there? If "Yes" => To which countries did you want to go? Second answer
V244	q22p_3	3rd country EGO wanted to go	Q22. We have already talked about the places where you lived for at least one year. But have you ever undertaken concrete steps in order to leave and settle in a different country, without, however, having so far been successful in getting there? If "Yes" => To which countries did you want to go? Third answer
V245	q22p_4	4th country EGO wanted to go	Q22. We have already talked about the places where you lived for at least one year. But have you ever undertaken concrete steps in order to leave and settle in a different country, without, however, having so far been successful in getting there? If "Yes" => To which countries did you want to go? Fourth answer
V173	q800	Number of migration attempts	800. I WOULD LIKE TO ASK YOU SOME MORE QUESTIONS ABOUT THE COUNTRIES TO WHICH YOU WOULD HAVE LIKED TO GO, BUT YOUR MIGRATION PLANS HAVE NOT (OR NOT YET) BEEN REALIZED.
V246	q23	Stay of less than a year abroad	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life.
V247	q23p_1	1st country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? First answer
V248	q23p_2	2nd country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Second answer
V249	q23p_3	3rd country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Third answer
V250	q23p_4	4th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Fourth answer
V251	q23p_5	5th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Fifth answer
V252	q23p_6	6th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Sixth answer

ID	Name	Label	Question
V253	q23p_7	7th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Seventh answer
V254	q23p_8	8th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Eighth answer
V255	q23p_9	9th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Ninth answer
V256	q23p_10	10th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Tenth answer
V257	q23p_11	11th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Eleventh answer
V258	q23p_12	12th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Twelfth answer
V259	q23p_13	13th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Thirteenth answer
V260	q23p_14	14th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Fourteenth answer
V261	q23p_15	15th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Fifteenth answer
V262	q23p_16	16th country EGO stayed less than a year	Q23. And have you already stayed for periods of less than a year outside DR Congo (but spending at least one night there)? This can also be a country where you have lived for a longer period at another time in your life. If "Yes" => In which countries have you stayed? Sixteenth answer
V166	q600t	Number of transit stays	600T.
V167	q600i	Number of set stays	600I.
V168	q600m	Number of long stays	600M.
V169	q600tot	Total number of stays	600TOT. Total:
V263	q24	Contribution to associations	Q24. In the time that you spent abroad, were you at any time paying contributions or membership fees to one or more associations (including religious organisations) that finance projects in DR Congo or support Congolese migrants in Europe?
V264	q25	Did you seek asylum	Q25. Over the years that you lived outside DR Congo, did you seek asylum?

ID	Name	Label	Question
V170	q700s	Number of short returns	700S.
V171	q700r	Number of long returns	700R.
V172	q700t	Total number of returns	700TOT. Total:
V292	remarques	Remarks	Would you like to make any comments or give us your opinion about this questionnaire or this study?
V298	h_fin	Hour of the end of the interview	END TIME:
V274	e1	This person was	E1. This person was:
V275	e1a	For what reason was she/he reluctant	E1A. For what reasons was he/she reluctant to participate? And which arguments enabled you to convince him/her in the end?
V276	e2	The reception by the respondent was	E2. The reception by the respondent was:
V277	e2r	On which questions the respondent was reluctant	E2R. Which ones?
V278	e2a	Specify the "Other" (e2)	E2. The reception by the respondent was: If "Other" => Specify
V279	e3_1	1st language used in the interview	E3. In what language(s) did you conduct the interview?
V280	e3a	Other language used in the interview	E3. In what language(s) did you conduct the interview? If "Other" => Specify
V281	e4	Were any other person present during the interview	E4. And were any other person(s) present during the interview?
V282	e4i	Did you have the impression she/he influenced the answers	E4I. Did you have the impression that this presence influenced the respondent in his/her answers?
V283	e4q	On which questions the respondent was influenced	E4Q. Which ones (specify the nb of the questions)?
V284	e5	Where there any interruptions	E5. Were there any interruptions?
V285	e5a	Specify (interruptions)	E5A. Specify
V286	e6	Was the respondent's general comprehension of the questions...	E6. According to you, was the respondent's general comprehension of the questions:
V287	e7	Did the respondent have problems answering certain questions	E7. And did the respondent have problems answering certain questions?
V288	e7d	On which questions the respondent had problems	E7D. Which ones? N°
V289	e8	Did the respondent refuse to answer certain questions	E8. Did the respondent refuse to answer certain questions?
V290	e8r	On which questions the respondent refused to answer	E8R. Which ones? N°
V291	e9	Did you give a gift to the interviewee	E9. Did you give a gift to the interviewee?
V174	q900	Number of personal network who have lived abroad	900. Count in the AGEVEN the number of family or personal network members who have lived outside DR Congo __ and fill in one column per person (in principle, number equal to Q17TOT).
V175	q1000	Number of returns	1000. Count in the Ageven all returns (R1, R2, etc., and each AR) without including the returns to settle marked as "R INST": __
V176	q1100	Number of stays abroad	1100. Count in the Ageven the stays outside DR Congo marked VAC and AFF: __ ATTENTION: don't count those stays marked INST or TRANSIT
V177	q1200	Number of nationality changes	1200. Count in the Ageven the number of nationality changes: __
V178	q1300	Number of sought asylum	1300. Count in the Ageven the number of times ego sought asylum:
V179	q1410	Number of residence status	1410. Number of periods of residence status: __
V180	q1510	Number of work permits	1510. Number of periods of work permits: __

V2215	hhwealth	Wealth index of the HH	
V2216	exp_fact_men	Inflating factor household	
V2217	weight_hhd	Normalized weight by HH	

Total: 187

Fichier de données: rdc_qm_indiv

One line per declared individual in the HH questionnaire, i.e. a total of 15558 individuals in DR Congo

Observations in this data file correspond to:

- Individuals living in the household at the time of the survey (A4=1)
- Individuals living outside the household (A4=2) included in the roster if they enter into one of the following categories:
 - * / children of the HH head who no longer live with her/him, whatever her/his place of residence;
 - * / partners of household members who live outside DR Congo;
 - * / parents of household members who live outside DR Congo;
 - * / other people living outside DR Congo and who had regular contact with the household during the 12 months before the survey.

WARNING! Don't forget that only part of the people listed in the household questionnaires, i.e. in "qm_indiv" are actual members of the households.

Furthermore, keep in mind that some individuals, in this dataset, never lived in Congo, Ghana or Senegal. For example:

- Descendants of migrants, born in the destination country of their parents. Ex: the HH head is a grandfather whose son has immigrated to France, where he had children. These children can be mentioned by the grandfather in the third category "other persons living outside Senegal but who have kept regular contact with the HH during the 12 months before the survey", even if they have never lived in Senegal.
- Relatives of immigrants in Congo, Ghana or Senegal. Ex: the HH head is an immigrant woman from Angola. She has left behind (in her home country) her husband and children. Even if they have never lived in Congo, she mentioned them in the HH questionnaire because they are in the third category.

The dataset contains all variables of the questionnaire and some additional computed variables.

Cas: 15612

Variables: 148

Variables

Fichier de données: rdc_qb_return

!! One line per return to DR Congo for each person who declared at least one return and one line for the other interviewees
!!

Note: returns listed in this module are returns that lasted at least 1 year and shorter returns but with the intention of settling. Other returns (less than a year without intention to resettle) are listed in the qb_short_return datafiles.

This dataset contains:

- all the answers to the module Return to DR Congo.
- a series of dichotomous variables created from the questions q707 and q708.

All MAFE's biographic files include the same 18 variables listed below:

- ident
- id_country
- n_menage
- n_indiv
- num_dr
- strata_area
- strata_hh
- strata_ind
- q1
- q1a
- age_survey
- q18
- flag_age
- flag_arrival
- flag_visitor (exception: only available for MAFE Senegal)
- weight_eur
- weight_all
- weight_ctry

Cas: 2103

Variables: 72

Variables

ID	Name	Label	Question
V2366	ident	Biographic individual identifier

C EST UN ECHANGE D IDEE ET JE RESTE DISPOSER POUR VOUS FOURNIR D AUTRE INFORMATIONS SI VOUS EN AVEZ BESOIN	1	0.1%
C EST UNE BONNE CHOSE, LA RECHERCHE PEUT BENEFICIER A BEAUCOUP DE PERSONNES.	1	0.1%
C EST UNE BONNE ETUDE	4	0.2%
C EST UNE BONNE ETUDE NOUS VOUS SOUHAITONS BONNES CHANCE	1	0.1%
C EST UNE ETUDE TRES INTERESSANTE	1	0.1%
C EST UNE ETUDE TRES INTERESSANTE CAR SANS CETTE ETUDE ON NE PEUT PAS CONNAITRE CE QUI SE PASSE AU PAYS	1	0.1%
C EST VRAIMENT LONG COMME QUESTIONNAIRE	1	0.1%
C EST VRAIMENT LONGUE COMME ETUDE	1	0.1%
C'EST BIEN CA ME RAPPELLE L'EPOQUE PASSE	1	0.1%
C'EST BIEN , JE N'AI RIEN A DIRE	1	0.1%
C'EST SA VIE QUI A ETE EXPOSEE ET ELLE ESPERE QU'ELLE NE VIVRA PAS EN DANGER	1	0.1%
C'EST TRES IMPORTANT , SI ON SORT DES INDICATEURS VALABLES ET SI LES SUGGESTIONS SERONT MISES EN OEUVRES . NOUS SUGGERONS UNE BONNE POLITIQUE MIGRATOIRE AU CONGO	1	0.1%
C'EST UN REEL PLAISIR DE POUVOIR T'AIDER	1	0.1%
C'EST UNE ETUDE TRES INTERESSANTE	1	0.1%
C'EST UNE BONNE ETUDE	1	0.1%
C'EST UNE BONNE ETUDE	1	0.1%
C'est bien	2	0.1%
C'est bien de savoir comment vivent les Congolais derriere. Mais j'ai besoin de rester chez moi. J'aime bouger. ca me fait mal de rester en centre comme ca. Je voudrais retrouver ma famille au chili	1	0.1%
C'est bien mais c'est difficile d'avoir la realite des parcours pour les demandes d'asile, je crois, parce qu'ils changent souvent d'identite, ils racontent differents parcours. C'est complique.	1	0.1%

C'est cool comme questionnaire	1	0.1%
C'est la vie d'une personne que l'on étale à travers ce questionnaire; je ne sais pas si beaucoup de personnes vous diront la vérité.	1	0.1%
C'est long	1	0.1%
CA MA ÉVEILLE ET DE JETER UN COUP D'ŒIL SUR LA MIGRATION	1	0.1%
CE BIEN CE GENRE D'ÉTUDES C'EST FANTASTIQUE CA PREND BEAUCOUP DES TEMPS POUR LES GENS QUI SONT TRÈS OCCUPÉS CA RISQUE DE NE PAS ÊTRE EFFICACE POUR CERTAINS MILIEUX	1	0.1%
CE N'EST PAS UNE BONNE ÉTUDE CAR ELLE DÉVOILE LA VIE DES GENS À NU	1	0.1%
CE QUESTIONNAIRE RÉSUME TOUTE MA VIE. J'ESPERE SEULEMENT QUE LE HOME OFFICE NE L'UTILISERA PAS POUR RECONSIDÉRER MON DOSSIER. À QUOI SERVIRONT TOUTES CES QUESTIONS?	1	0.1%
CE QUESTIONNAIRE EST COMPLIQUÉ POUR MOI. J'AI FAIT DE MON MEILLEUR POUR RÉPONDRE À VOS QUESTIONS. J'ESPERE QUE MA DEMANDE D'ASILE POLITIQUE NE SERA PAS AFFECTÉE.	1	0.1%
CE QUESTIONNAIRE EST INQUISITIVE AVEC BEAUCOUP DE QUESTIONS PERSONNELLES. À QUOI SERVIRA CETTE ÉTUDE DE MIGRATION?	1	0.1%
CE QUESTIONNAIRE EST MA BIBLIOGRAPHIE. À QUOI SERT-IL? J'Y AI RÉPONDU PARCE QUE JE VOUS CONNAIS PERSONNELLEMENT, AUTREMENT, J'AURAIS REFUSÉ.	1	0.1%
CE QUESTIONNAIRE EST TRÈS LONG	1	0.1%
CE QUESTIONNAIRE EST TRÈS LONG. QUELLE EST SA RAISON D'ÊTRE? POUR ARRÊTER LA MIGRATION, IL FAUDRA QUE LES DIRIGEANTS AFRICAINS TRAVAILLENT VRAIMENT POUR LEURS PAYS AU LIEU DE TUER LEURS CONCITOYENS ET METTRE DE L'ARGENT DANS DES BANQUES SUISSES	1	0.1%
CE QUESTIONNAIRE EST TROP PERSONNEL AVEC BEAUCOUP DE QUESTIONS PERSONNELLES. IL RESEMBLE À UN FICHIER DES SERVICES DE SÉCURITÉ - PAS BON.	1	0.1%
CE QUESTIONNAIRE N'EST-IL PAS UN MOYEN POUR QUE LE GOUVERNEMENT ANGLAIS FERME SES PORTES AUX DEMANDEURS D'ASILE POLITIQUE? IL A BEAUCOUP DE QUESTIONS PERSONNELLES.	1	0.1%
CE QUESTIONNAIRE PERMET DE SE SOUVENIR DU PASSÉ	1	0.1%
CE QUESTIONNAIRE SEMBLE ÊTRE COMPLEXE. IL EST UN PEU TROP PERSONNEL DÉBORDANT DE CURIOSITÉ. IL EST COMME UN AGENT DE SÉCURITÉ RECOLTANT DES INFORMATIONS SUR MOI.	1	0.1%
CE QUESTIONNAIRE SEMBLE ÊTRE TOUTE MA BIOGRAPHIE. L'ASSURANCE DE L'ANONYMAT SUR MON IDENTITÉ EST L'UN DES FACTEURS QUE J'ACCEPTÉ DE PRENDRE PART À CE TRAVAIL.	1	0.1%
CE SONT DES QUESTIONS INTÉRESSANTES	1	0.1%
CES ÉTUDES N'ABOUTISSENT PAS. C'EST COMME SI ELLES SONT FAITES POUR QUE LES ÉTUDIANTS S'EXERCENT ET TOUT EST DÉPOSÉ À LA BIBLIOTHÈQUE ET TIRROIRS DE DÉCIDEURS. RESTONS TOUTE FOIS OPTIMISTE.	1	0.1%
CES QUESTIONS DONNENT L'IMPRESSION D'UNE ENQUÊTE POLICIÈRE	1	0.1%
CESSEZ DE TOURMENTER LES CONGOLAIS, ARRÊTEZ LA GUERRE, LAISSEZ LA RDC SE DÉVELOPPER, ET VOUS N'AUREZ PLUS CES PROBLÈMES D'IMMIGRATION.	1	0.1%
CESSEZ DE VENDRE VOS ARMES EN RDC ET SES PAYS VOISINS. TROP LONG, TROP DE QUESTIONS TOUCHANT À MA VIE PRIVÉE. SI VOUS VOULEZ ARRÊTER L'IMMIGRATION, LAISSEZ LA RDC TRANQUILLE (SES RICHESSES).	1	0.1%
CEST BIEN MAIS IL NE FAUT PAS QUE L'ON ME POURSUIVE À CAUSE DE CE QUESTIONNAIRE	1	0.1%
CEST UNE BONNE ÉTUDE	1	0.1%
CEST UNE ÉTUDE TRÈS INTÉRESSANTE	1	0.1%
CET ENTRETIEN EST INTÉRESSANT POUR COMPRENDRE LA TRAJECTOIRE DES MIGRANTS.	1	0.1%

CETTE ETUDE EST NECESSAIRE DU POINT DE VUE STATISTIQUE, ET LES VERITABLES RAISONS MIGRATOIRES RESIDENTS DANS LE MARASME ECONOMIQUE, L INTOLERANCE POLITIQUE, L OPPRESSION ET ARRESTATIONS ARBITRAIRES	1	0.1%
CETTE ETUDE MET TROP D ACCENT SUR LES DATES ANTERIEURES	1	0.1%
CETTE ETUDE RETRACE TOUTE MA VIE SI VOS CHEFS POURRAIENT LE PERMETTRE VOUS ALLIEZ ME FAIRE UNE COPIE POUR QUE QUAND JE VEUX MOURRIR MES PETIT FILS POURRONS AVOIR L IDEE DE LA VIE DE LEUR GRAND PERE	1	0.1%

Question(s) et instruction(s)

TEXTE PRÉCÉDENT LA QUESTION

INTERVIEWER: In this module you have to fill in one column for EACH of the houses occupied by the respondent.

Special case: If the respondent commutes between two different places of residence during a certain period of time: Fill in a column to describe each of the houses, place a curly bracket over the 2 columns and note the frequency of changeover (e.g. 7 months in Belgium; 3 months in DR Congo, or weekdays in boarding school; weekends at my Uncle's place).

QUESTION

301D - 301F. Years of arrival in and departure from the house

Year of departure

QUESTION

Q1. The respondent is:

MODALITÉS

Valeur	Modalité	Cas	
1	Man	5011	48.8%
2	Woman	5251	51.2%

TEXTE SUIVANT LA QUESTION

To begin with, I would like to note the major events and periods of your life on this grid. We will begin at the time of your birth. Later we will look at these periods of life in some more detail.

Q1A: Year of birth

Fichier de données: rdc_qb_network

Aperçu

Valides: 10262 Valeurs manquantes: 0 Minimum: 1934 Maximum: 1984

Type: Discret Décimale(s): 0 Longueur: 17 Intervalle: 1932 - 9999 Format: Numérique

Question(s) et instruction(s)

QUESTION

Q1A. To start with, and to help us to set a time scale, could you tell me in which year you were born (or your age as at last birthday)?

Year of birth

TEXTE PRÉCÉDENT LA QUESTION

Introduction

Read to the respondent before beginning with the questionnaire:

"We thank you for accepting to participate in this study organized by researchers from the UNIKIN and the UCL.

This survey will serve to study Congolese migrations and the impact of migration on households.

I will ask you the questions listed in this questionnaire. It is important that you give honest answers.

I remind you that this questionnaire is anonymous and that your answers are confidential."

"We will talk about the persons who live in this household. We will also talk about persons who do not live here, but which whom you have important links."

QUESTION

Apart from the children currently living here, does or did the household head have other children (biological or adopted), including children who are deceased?

TEXTE SUIVANT LA QUESTION

=> Next page

To be read to the head of the household (or the person who replied to the questionnaire)

"We have now come to the end of this questionnaire. I and the entire team thank you very much for your cooperation and your participation in this study.

There are two forms of questionnaires for each selected household. The first stage is this questionnaire that we have just filled out. The second consists of questions which will be answered by you or another person in the household.

I will therefore visit you again shortly and ask the selected member(s) of your household to answer the other questionnaire.

I thank you again very much for your welcome."

TEXTE PRÉCÉDENT LA QUESTION

Module BC - Migrants' experiences (all those marked ETR on the flap)

"Now we will talk about all those persons who you told me are currently living abroad, and more especially on the relationships between these people and your household. Some questions are about the money or the material goods that the persons living abroad may have sent you over the past 12 months. You may think that these questions are indiscrete, but they allow us to find out if migration helps Congolese households."

Last migration

QUESTION

B1. The last time he/she left Congo to settle in another country, he/she left...

1st reason

1	Yes	14	0.7%
Sysmiss		1308	

Description

LABEL

The migrant (current or returnee) arrived in Europe the 1st time before 18.

WEIGHT_EUR: Weighting normalized on the 3 european countries

Fichier de données: rdc_qb_return

Aperçu

Valides: 440 Valeurs manquantes: 1663

Type: Continu Décimale(s): 2 Longueur: 9 Intervalle: 0.123741947114468 - 2.92577934265137 Format:

Numérique Pondération: Oui

Description

LABEL

Use when working on the European countries pooled together (for example, the Senegalese population sampled in France, Italy and Spain). It should not be used if the analyses include individuals surveyed in Africa.

WEIGHT_ALL: Weighting normalized on the 4 countries

Fichier de données: rdc_qb_return

Aperçu

Valides: 2103 Valeurs manquantes: 0

Type: Continu Décimale(s): 2 Longueur: 9 Intervalle: 0.043433666229248 - 7.21617412567139 Format:

Numérique Pondération: Oui

Description

LABEL

Use when working on all countries of the MAFE survey (for example, Senegalese population from Senegalese, French, Italian and Spanish samples).

WEIGHT_CTRY: Weighting normalized by country

Fichier de données: rdc_qb_return

Aperçu

Valides: 2103 Valeurs manquantes: 0

Leaflet

Titre	Leaflet
Description	<p>Presents the main objectives of the survey, and aims at informing the respondents on the use of the data. In addition to information on the objectives of the survey, the leaflet also includes contacts of the persons in charge of the MAFE project in the country.</p> <p>The leaflet was used at different stages of the project. In Mafe Senegal, it was used before the surveys to inform migrant associations in France and to sensitize the populations of the neighbourhoods selected for the survey in Dakar. The leaflet was also handed over to all respondents in France and Spain, and to those who were particularly interested in Senegal. Presents the main objectives of the survey, and aims at informing the respondents on the use of the data. In addition to information on the objectives of the survey, the leaflet also includes contacts of the persons in charge of the MAFE project in the country.</p>

Introduction to the MAFE datasets

Titre	Introduction to the MAFE datasets
Description	The aim of this document is to provide an introduction to the MAFE datasets, giving basic information to help users understand the structure and content of all MAFE datasets.
Nom du fichier	IE0216A_PresentationDatasets.pdf

Methodological note 1

Titre	<p>Methodological note 1</p> <p>Beauchemin, C., Kabbanji, L., Lessault, D., & Schoumaker, B., 'Migrations between Africa and Europe: Survey Guidelines', April 2010 (EN)</p>
Description	The objective of this document is to present the MAFE survey methodology. It includes a presentation of all the tools used in the 9 countries. This document is complemented by a data collection report. It was primarily written on the basis of the MAFE-Senegal experience in order to ease its replication on Congolese and Ghanaian populations.
Nom du fichier	IE0216A_T1.pdf

Methodological note 2

Titre	<p>Methodological note 2</p> <p>Schoumaker, B. & Diagne, A., 'Migrations between Africa and Europe: Data Collection Report', May 2010 (EN)</p>
Description	This report is a synthesis of the country reports in Africa and Europe, and was prepared by the UCL team, in charge of the coordination of data collection in the countries participating in the MAFE project. The first part of the report is on data collection in Africa, and the second part on Europe.
Nom du fichier	IE0216A_T2.pdf

Methodological note 3

Titre	<p>Methodological note 3</p> <p>Beauchemin, C. & González-Ferrer, A. 'Sampling international migrants with origin-based snowballing method: New evidence on biases and limitations', Demographic Research, 25 (3), 103-134, July 2011 (EN)</p>
Description	This paper provides a methodological assessment of the advantages and drawbacks of the origin-based snowballing technique as a reliable method to construct representative samples of international migrants in destination areas.
Nom du fichier	IE0216A_T3.pdf

Methodological note 4

Titre	Methodological note 4 Razafindratsima, N., Legleye, S., Beauchemin, C., 'Biais de non-réponse dans l'enquête Migrations entre l'Afrique et l'Europe (MAFE-Sénégal)', (FR)
Description	L'objectif de cette note est d'évaluer les biais engendrés par la non-réponse totale de niveau ménage et de niveau individuel dans le volet sénégalais de l'enquête MAFE.
Nom du fichier	IE0216A_T4.pdf

Methodological note 5

Titre	Methodological note 5 Beauchemin, C., 'Migrations between Africa and Europe: Rationale for a Survey Design', January 2012 (EN)
Description	The paper first presents the scientific objectives of the MAFE project, briefly pointing up the limitations of the existing literature in four domains: patterns of migration, determinants of departure and return, migration and family changes, migrants' economic integration and re-integration. The paper then presents the methodological principles of the MAFE survey design and the choices made to produce a new dataset containing information on the four aforementioned topics. Beyond the MAFE project, the paper highlights the classical problems in survey methodology facing all data producers in the domain of international migration, and advocates a more (self-)critical approach in this field of literature.
Nom du fichier	IE0216A_T5.pdf

Methodological note 6

Titre	Methodological note 6 Schoumaker, B. & Mezger, C., 'Sampling and computation weights in the MAFE Surveys', January 2013 (EN)
Description	This note describes the sampling strategy and the computation of weights in the MAFE surveys. The first part explains designs in Ghana, DR Congo and Senegal, the second part describes the computation of weights in the European samples, followed by the description of the computation of normalized weights to be used with pooled data sets in the third part. The fourth part provides a short review of the literature about the use of weights in different types of analysis. The review provides the background to the final section, which contains indications regarding use of weights for analysis with MAFE data.
